

Thor

“tor”

Protection & aggression in one.

Regeneration.

Thor (tor)

Thor causes the monthly sickness of woman

few are aroused at this time.

Thor- torture of woman

And cliff dweller

And husband of giantess

Who

Traditionally sone of Jord & Odin.

Thor is married to Sif, drives a chariot pulled by goats (which he can eat in the evening and will regenerate over night)

Reflections

He is perhaps most famous for his "hammer" which many people wear as a symbol of Thor's protection.

He is associated with thunder, protection, the thorn (links to male sexuality & protection), lightening and oddly menstruation!

The powerful symbol of protection, also holds the threat of attack (because why else would we need protection)

I persevere Thor as energy, he is associated with fire as well- but to me he is the energy.

He is connected with the maternal line, blood line, health issues, menstruation, fertility, and can be linked to aggression and sexual aggression.

Robins & rowans- again the link with red, and blood.

There is a feeling of regeneration, and continuation. The Midgard serpent he kills, the belt he wears link him to the snake eating it's own tail, the endless cycle of birth and death. Linked to the maternal blood which is the womb of creation.

Beware the protector and the aggressor are both present in this rune.
